SYSTEMS RESEARCH *and* BEHAVIORAL SCIENCE

VOLUME CONTENTS — VOLUME 18, ISSUE Nos.1–6

Volume 18 Number 1 **January–February 2001**

1 Editorial
Mike C. Jackson

3 The Quest for Competence in Systemic Research and Practice
Werner Ulrich

29 Systems Approach to Knowledge Development for Creating New Products and Services
John Pourdehnad and Patrick J. Robinson

41 Towards Unifying Science: Applying Concepts Across Disciplinary Boundaries
Kenneth D. Bailey

63 Certain Similarities Between the Evolution of Cooperation and Phase Transitions in Physics
Stavros Theodorakis

69 Systems Hierarchies and Management
Dante P. Martinelli

83 How to Become a System Guru? The Path to Energize System Gurus of the New Millennium to Make System Science More Credible
John P. van Gigch

89 News

91 Book Reviews

Volume 18 Number 2 **March–April 2001**

101 Guest Editorial: Systemic Research on Competence and Competence Development in SMEs
Stig C. Holmberg

103 A Holistic Approach to Competence Development
Lennart Sundberg

115 Competence Development and Learning Organizations: A Critical Analysis of Practical Guidelines and Methods
Ulrica Löfstedt

127 Taking Syntegrity-4 from Assumption Mode to Reflection Mode
Stig C. Holmberg

137 Intelligent Organizations: An Integrative Framework
Markus Schwaninger

159 The Forgotten Revenue of Product Development: Learning New Competence
Jan Österlund

171 Multi-Modal Systems Method: The Impact of Normative Factors on Community Viability
Veronica D. de Raadt

181 Multi-Modal Investigation of a Business Process and Information System Redesign: A Post-Implementation Case Study
Darek M. Eriksson

Volume 18 Number 3 **May–June 2001**

197 Editorial
Mike C. Jackson

199 On Misdirected Systems
Russell L. Ackoff and John Pourdehnad

207 A Sociological Systems Theory of Interorganizational Network Development in Health and Social Care
Arno van Raak and Aggie Paulus

225 New Regional Community Creation, Medical and Educational Applications through Video-Based Information Networks
Mitsuru Kodama

241 'Effective Governance' Through Complexity Thinking and Management Science
Leroy White

259 Creating Transforming Leadership for Organizational Change: The CogniScope System Approach
Larry A. Magliocca and Alexander N. Christakis

279 News

280 Book Review

Volume 18 Number 4 **July–August 2001**

283 Guest Editorial: Designing Educational Systems for the Twenty – First Century
Patrick M. Jenlink

287 We Enter the Twenty – First Century with Schooling Designed in the Nineteenth
Bela H. Banathy

291 On the Opening of Society: Towards a More Open and Flexible Educational System
Minna Takala, David Hawk and Yannis Rammos

307 The Epistemological Foundations of Evolutionary Systems Design
Alexander Laszlo

323 Appreciative Design
Karen E. Norum

335 Narrative Inquiry: Designing the Processes, Pathways and Patterns of Change
Peggy B. Gill

345 Activity Theory and the Design of Educational Systems: Examining the Mediational Importance of Conversation
Patrick M. Jenlink

361 Post–Formal Design Conversation: Designing Just and Caring Educational Systems
Raymond A. Horn Jr.

373 News

Volume 18 Number 5 **September–October 2001**

377 Guest Editorial: ISSS Yearbook 2000
Jennifer M. Wilby

379 Learning, Design, and Action: Creating the Conditions for Evolutionary Learning Community
Kathia Castro Laszlo

393 Laws of Geometric Systems
Curt McNamara

403 Natural Philosophy and Developmental Systems
Stanley N. Salthe

411 Cybernetics and the Social Sciences
Bernard Scott

421 Cybersemiotics: A Reconceptualization of the Foundation for Information Science
Søren Brier

429 Management Observation and Communication Theory and Organizational Information
G. A. Swanson

443 News

Volume 18 Number 6 **November–December 2001**

445 Editorial
M. C. Jackson

447 Autopoiesis, Agency and Accident: Criteria for the Attribution of Life
W. Cameron

461 Are Organizations Autopoietic? A Call for New Debate
Robert Kay

479 An Axiological Systems Theory: Some Basic Hypotheses
Francisco Parra-Luna

505 Adaptation to Creation: Progress of Organizational Learning and Increasing Complexity of Learning Systems
K. Unnikrishnan Nair

523 Product, Process and Methodology Systematization to Handle Structural and Computational Complexity in Product Realization
Biren Prasad

545 Systems Theory and the Spirit of Feminism: Grounds for a Connection
Barbara Hanson

557 On Turing's Carnal Error: Some Guidelines for A Contextual Inquiry into the Embodied Mind
Yair Neuman

565 Emergent Properties: A Fundamental Postulate of Classical Systems Theory in Schematic Representation
Joseph Germana

569 Flexibility Metaphors
Sushil
